Research Letters

Nonmutagenicity of maleic acid and its sodium salts in Salmonella assays (MTRL 073)
by R.S. Lake, G.L. DeVito, R.J. Szot and E. Schwartz (U.S.A.) 1

Enhancement and inhibition of benzo[*a*]pyrene-induced SOS function in *E. coli* by synthetic antioxidants (MTRL 070)
by J. Potenberg, W. von der Hude, M. Bauszus, A. Basler and R. Kahl (F.R.G.) 7

Instability of a yeast centromere plasmid under conditions of thymine nucleotide stress (MTRL 072)
by S.E. Kohalmi, R.H. Haynes and B.A. Kunz (Canada) 13

Relationship between the induction of mitotic gene conversion and the formation of thymine glycols in yeast *S. cerevisiae* treated with hydrogen peroxide (MTRL 076)
by M. Kaneko, S.A. Leadon and T. Ito (Japan and U.S.A.) 17

DNA sequence analysis of X-ray-induced deletions at the *white* locus of *Drosophila melanogaster* (MTRL 074)
by A. Pastink, C. Vreeken, A.P. Schalet and J.C.J. Eeken (The Netherlands) 23

Induction of translocations in mouse spermatogonia after fractionated exposure to ^{60}Co γ-rays (MTRL 078)
by J. Gilot-Delhalle, J. Moutschen and J. Garsou (Belgium) 29

A comment on the quantitative relationship between micronuclei and chromosomal aberrations (MTRL 075)
by J.R.K. Savage (Great Britain) 33

Synergism of 1-β-D-arabinofuranosylcytosine with itself and aphidicolin (MTRL 071)
by R.C. Moore and C. Randell (Australia) 37

Liquid-holding experiments with human lymphocytes
III. Experiments with G0 and G1 cells (MTRL 077)
by S. Kalweit, V. Vasudev and G. Obe (F.R.G. and India) 41

The contribution of nitrofluoranthenes and nitropyrenes to the mutagenic activity of ambient particulate organic matter collected in southern California (MTRL 084)
by J. Arey, B. Zielinska, W.P. Harger, R. Atkinson and A.M. Winer (U.S.A.) 45

Molecular analysis of *Drosophila melanogaster* Adh^{nLA405} confirms reliability of DNA-sequencing methodology (MTRL 079)
by M.B. LoMonaco, M.A. Batzer, B. Tedischi, S.H. Chang and W.R. Lee (U.S.A.) 53

A new method to reveal the genotoxic effects of *N*-nitrosodimethylamine in pregnant mice (MTRL 082)
by C. Bolognesi, L. Rossi and L. Santi (Italy) 57

Detection of *N*-acetyl derivative of 2-amino-6-methyldipyrido[1,2-*a*:3′,2′-*d*]imidazole (Glu-P-1) in Glu-P-1-injected rats (MTRL 080)
by Y. Kanai, S. Manabe and O. Wada (Japan) 63

Induction of sister-chromatid exchanges by procarcinogens in metabolically competent Chinese hamster epithelial liver cells (MTRL 081)
by R. De Salvia, R. Meschini, M. Fiore, S. Polani, F. Palitti, M.A. Carluccio and G. Turchi (Italy) 69

Do trifluorothymidine-resistant mutants of L5178Y mouse lymphoma cells re-express thymidine kinase activity following 5-azacytidine treatment ? (MTRL 086)
by M.M. Moore, M.L. Applegate and J.C. Hozier (U.S.A.) 77

Potentiation of Alu I-induced chromosome aberrations by high salt concentrations in Chinese hamster ovary cells (MTRL 083)
by S. Tuschy and G. Obe (F.R.G.) 83

Differential DNA repair effects in *E. coli* cells inoculated in intestinal organs of mice. Possible involvement of feed components and/or fecal mutagens (MTRL 085)
by S. Knasmüller, M. Zeilmaker, A. van der Gen, P. de Wit and G.R. Mohn (Austria, The Netherlands) 89

0165-7992/88/$03.50 © 1988 Elsevier Science Publishers B.V. (Biomedical Division)

Antimutagenic effects of chemicals on mutagenesis resulting from excision of a transposon in *Salmonella typhimurium* (MTRL 087)
by D.G. MacPhee and L.M. Hafner (Australia) 99
Loss of penicillinase plasmids of *Staphylococcus aureus* after treatment with L-ascorbic acid (MTRL 089)
by C.F. Amábile Cuevas (Mexico) 107
A preliminary study of an iron porphyrin – iodosylbenzene system for activation of mutagens in the Ames assay (MTRL 090)
by I.T. Salmeen, S. Foxall-VanAken and J.C. Ball (U.S.A.) 111
Deinococcus radiodurans UV endonuclease β DNA incisions do not generate photoreversible thymine residues (MTRL 091)
by D.M. Evans and B.E.B. Moseley (Great Britain) 117
Anthraflavic acid inhibits the mutagenicity of the food mutagen IQ: Mechanism of action (MTR 04593)
by A.D. Ayrton, C. Ioannides and R. Walker (Great Britain) 121
Induction of mutations by tritiated water and [^{3}H]thymidine in *Drosophila melanogaster* assayed by the somatic *zeste–white* eye mutation system (MTRL 092)
by Å. Rasmuson, N. Xamena, A. Creus and R. Marcos (Sweden, Spain) 127
Effect of copper coordination complexes on sister-chromatid exchanges in plant cells (MTR 04575)
by M.J. Hazen, A. Juarranz, J.C. Stockert, A. Gonzalez and D. Beltrán-Porter (Spain) 135
Use of the frequencies of micronuclei as quantitative indicators of X-ray-induced chromosomal aberrations in human peripheral blood lymphocytes: Comparison of two methods (MTR 04560)
by A. Ramalho, I. Sunjevaric and A.T. Natarajan (The Netherlands, Brasil, Yugoslavia) 141
Influence of ammonium sulfate and sodium chloride on ethyl methanesulfonate-induced chromosomal aberrations and HPRT mutations in V79 hamster cells (MTR 04566)
by C. Nowak (F.R.G.) 147
Effects of bleomycin on Down's syndrome lymphocytes in culture (MTR 04582)
by P. Gadhia, M. Gadhia and H. Zankl (India, West Germany) 153
The relationship between sperm chromosomal abnormalities and sperm morphology in humans (MTR 04587)
by R.H. Martin and A. Rademaker (Canada) 159
Tissue-specific variation in repair activity for 3-methyladenine in DNA in two stocks of mice (MTRL 088)
by W.J. Washington, W.C. Dunn Jr., W.M. Generoso and S. Mitra (U.S.A.) 165
Activation of a well behaved cell cycle in araC-treated V79 cells by caffeine (MTRL 093)
by S.K. Das (U.S.A.) 171
Induction of sister-chromatid exchanges in L1210 leukemia cells by new antitumor 2-haloethyl(methylsulfonyl) methanesulfonate compounds (MTRL 094)
by K.M. Siddiqui, J.A. Alexander and R.F. Struck (U.S.A.) 179
Spontaneous expulsion of micronuclei by enucleation in the micronucleus assay (MTRL 095)
by S. Nito, F. Ariyuki and A. Okaniwa (Japan) 185
Reduction of 2-acetylaminofluorene-induced unscheduled DNA synthesis in human and rat hepatocytes by butylated hydroxytoluene (MTR 04584)
by J.K. Chipman and J.E. Davies (Great Britain) 193
Mutagenic activity in smoke formed during broiling of lean pork at 200, 250 and 300 °C (MTR 01260)
by I. Berg, E. Övervik, C.-E. Nord and J.-Å. Gustafsson (Sweden) 199
Mutagenicity of naphthacene, a non-bay-region aromatic hydrocarbon, in Salmonella (MTR 01274)
by R. Pahlman (Finland) 205

Errata 213

Contents, Vol. 207 (1988) 215

MUTATION RESEARCH

International journal on mutagenesis, chromosome breakage and related subjects

INSTRUCTIONS TO AUTHORS

Types of paper *Mutation Research* contains 3 types of publication. (1) Papers reporting results of original fundamental research concerning mutagenesis, chromosome breakage and related subjects. (2) Review articles. (3) Short communications (to be published in the Section *Mutation Research Letters*).

General arrangement of papers Papers should be preferably in English, but may also be submitted in French or German. A summary (about 300 words) is mandatory for all (normal-length) articles. Papers in German or French should have a summary in English. The first paragraph of the article should summarize the research problem and the pertinent findings. The main text may be divided into sections such as Material and methods, Experimental, Results, Discussion.

In papers mentioning chemicals, authors are requested to include *CAS registry numbers*. Registry numbers can be found by consulting Chemical Abstracts Ninth Collective Molecule Formula Index, by using Lockheed's computer access file named Chemline or by contacting the Chemical Abstracts Service, P.O. Box 3012, Columbus, Ohio 43210 (U.S.A.).

Keywords **A list of 3–6 words or short phrases should be included on the first page of the manuscript. In the event that keywords are not supplied editorial discretion will be exercised in introducing appropriate words.**

Preparation of text (a) Manuscripts should be typewritten, double-spaced with wide margins, on one side of the paper only. Legends, footnotes — everything — must also be double-spaced. (b) The full postal address(es) of the author(s), including postal code and country, should be given after their name(s). (c) Line-drawn figures (including graphs) should be submitted in black ink on white paper and must be lettered ready for direct reproduction. Sharp photoprints of lettered line drawings may also be submitted. It is important that the drawings themselves *AND* the lettering are in proportion and large enough to allow for reduction before printing. Figures should be prepared suitably for *either* one column width (76 mm) *or* the entire page width (160 mm). The maximum height is 206 mm. The amount of reduction that will be made can be judged from the sizes of figures in recent issues of the journal. (d) Half-tone figures should be submitted as very sharp and contrasty glossy photoprints, separate from line drawings. (e) Legends for both line-drawn and half-tone figures should be typed on separate sheets. (f) Tables (also to be typed double-spaced) should be provided with headings. (g) Typescripts should be carefully checked before submission to obviate alterations after acceptance.

References The journal uses the Harvard system, in which names and dates are given in the body of the text and an alphabetical list of references at the end of the manuscript. References in the text should give the author's surname with the year of publication, e.g.: Smith (1980); Smith and Jones (1976a, 1979b); Baker et al. (1978). In the list of references, titles of journals should be abbreviated to conform with *Chemical Abstracts Bibliographic Guide for Authors and Editors 1974*. References to books should give details of chapter title, editors, title of the book, publishers and their location.

MUTATION RESEARCH LETTERS

Manuscripts – in triplicate – may be submitted to:
Dr. R.J. Preston, Managing Editor, Mutation Research Letters, Oak Ridge National Laboratory, Biology Division, P.O. Box Y, OAK RIDGE, TN 37830 (U.S.A.)

or to one of the Members of the Editorial Board:

Dr. Angelo Abbondandolo, Istituto Nazionale per la Ricerca sul Cancro, Viale Benedetto XV No. 10, 16132 GENUA (Italy)

Dr. Marija Alačević, Faculty of Technology, Laboratory of Industrial Microbiology, Pierottijeva 6/IV, 41000 ZAGREB (Yugoslavia)

James W. Allen, Ph.D., Research Biologist, Genetic Toxicology Division (MD-68), Health Effects Research Laboratory, U.S. Environmental Protection Agency, RESEARCH TRIANGLE PARK, NC 27711 (U.S.A.)

Dr. Bruce M. Cattanach, MRC Radiobiology Unit, HARWELL, Didcot, Oxon. OX11 ORD (England)

Professor D.R. Davies, John Innes Institute, Colney Lane, NORWICH NR4 7UH (England)

Professor Dr. H. Greim, Institut für Toxikologie und Biochemie, Abt. für Toxikologie, Gesellschaft für Strahlen- und Umweltforschung, Ingolstädter Landstrasse 1, D-8042 NEUHERBERG, Post Oberschleissheim (West-Deutschland)

Dr. R.H. Haynes, Department of Biology, York University, TORONTO (Downsview), Ont. M3J 1P3 (Canada)

Professor Franklin Hutchinson, Department of Molecular Biophysics and Biochemistry, Yale University, Box 6666, 260 Whitney Avenue, NEW HAVEN, CN 06511 (U.S.A.)

Dr. B. Kilbey, Institute of Animal Genetics, West Mains Road, EDINBURGH EH9 3JN (Scotland)

Dr. B. Lambert, Professor of Genetic Toxicology, Department of Clinical Genetics, Karolinska Sjukhuset, P.O. Box 60500, S-104 01 STOCKHOLM (Sweden)

Dr. Mortimer L. Mendelsohn, Lawrence Livermore Laboratory, Biomedical and Environmental Sciences Divisions, University of California, P.O. Box 5507, LIVERMORE, CA 94550 (U.S.A.)

Dr. E. Moustacchi, Institut Curie, Section de Biologie, 26, rue d'Ulm, 75231 PARIS Cédex 05 (France)

Professor Gregorio Olivieri, Istituto di Genetica, Facolta di Scienze, Città Universitaria, 00185 ROMA (Italy)

Professor Robert B. Painter, University of California, School of Medicine, Laboratory of Radiobiology, SAN FRANCISCO, CA 94143 (U.S.A.)

Dr. J.M. Parry, Department of Genetics, University College of Swansea, Singleton Park, SWANSEA SA2 8PP (England)

Dr. Herbert S. Rosenkranz, Professor and Director, Center for the Environmental Health Sciences, School of Medicine, Case Western Reserve University, CLEVELAND, OH 44106 (U.S.A.)

Professor F.H. Sobels, Editor-in-Chief, Mutation Research, Department of Radiation Genetics and Chemical Mutagenesis, State University of Leiden, Sylvius Laboratories, Wassenaarseweg 72, P.O. Box 9503, 2300 RA LEIDEN (The Netherlands)

Professor Takashi Sugimura, Director, National Cancer Center Research Institute, Tsukiji 5-chome, Chuo-ku, TOKYO 104 (Japan)

Dr. J.E. Trosko, Michigan State University College of Human Medicine, B-240 Life Science Building, EAST LANSING, MI 48824 (U.S.A.)

Dr. J. Veleminský, Czechoslovak Academy of Sciences, Institute of Experimental Botany, Department of Genetics, Vltavská 17, 150 00 PRAHA 5 (Czechoslovakia)
